### REMARKS

Applicant has cancelled claims 10-15, and 32. Currently pending with the entry of this amendment are claims 3, 4, 9, 27, 31 and 34.

In an interview with the Examiner on August 23, 2005, the applicant's attorney discussed with the Examiner that the presentation of the nucleotide sequence of SEQ ID NO: 7, the genomic sequence of the SBMu200 gene, along with its use, provides enablement for claims relating to the sequence and vector, to which the Examiner agreed. The Examiner also agreed that claims to plants and plant cells of maize comprising the sequence are allowable, and claims 4, 9, 27 and 31 are amended to so recite. The Examiner also located the Deposit Statement previously submitted, and has requested a Statement be re-submitted. Any reference to seed is removed, and a copy of both the deposit form and the receipt from the ATCC is included with this amendment, reflecting receipt of deposit of vector pBluescript SK in *E. coli* of SB200-8.1. The Examiner's attention is directed to the last paragraph of the Statement indicating that restrictions on the deposit will be removed irrevocably upon the granting of a patent. The information is also present in the conditions set out in the receipt from the ATCC. The deposit number was presented in the application in claim 34. Claim 34 is thus also in condition for allowance.

This amendment is presented to comply with the Examiner's request and does not present new matter. Entry is respectfully requested along with allowance of claims 3, 4, 9, 27 and 34.

Respectfully submitted,

## **DEPOSIT STATEMENT**

Commissioner for Patents Washington, D.C. 20231

Sîr:

The undersigned attorney, an attorney of record in this application, makes the following statement regarding deposits:

A deposit of host *E. coli* having a vector with DNA insert SB2008.1 is and has been maintained by Pioneer Hi-Bred International, Inc. since prior to the filing date of this application. Access to the deposit will be available during the pendency of this application to the Commissioner of Patents and Trademarks and persons determined by the Commissioner to be entitled thereto upon request. Upon allowance of any claims in the application, all restrictions on availability to the public of such material will be removed by affording access to a deposit of the microorganism with the American Type Culture Collection (ATCC) Rockville, MD. Additionally, applicant will meet all the requirements of 37 CFR§1.807, including providing an indication of the viability of the sample when deposit is made. The microorganism deposited with the ATCC will be taken from the same deposit maintained by Pioneer Hi-Bred International

### CERTIFICATE OF MAILING (37 C.F.R. § 1.8(a))

I hereby certify that this document was sent by facsimile transmission to The US Patent Office, AFTER FINAL, ATTN: A. KUBLIEK, facsimile (703)872-9306 on the date indicated below.

since prior to the filing date of this application. The deposit will be maintained in the ATCC depository, which is a public depository, for a period of 30 years or five years after the most recent request, or for the effective life of the patent, whichever is longer, and will be replaced if it becomes nonviable during that period.

All restrictions on availability of the aforementioned deposits will be removed irrevocably upon the granting of a patent on the captioned application or a continuing application based thereon.

Respectfully submitted,

Patricia A. Sweeney

The deposits were accompanied by: \_\_\_\_ a scientific description \_X a proposed taxonomic description indicated above. The deposits were received October 16, 1998 by this International Depository Authority and have been accepted.

We will inform you of requests for the strains for 30 years. AT YOUR REQUEST: X

The strains will be made available if a patent office signatory to the Budapest Treaty certifies one's right to receive, or if a U.S. Patent is issued citing the strains, and ATCC is instructed by the United States Patent & Trademark Office or the depositor to release said strains.

If the cultures should die or be destroyed during the effective term of the deposit, it shall be your responsibility to replace them with living cultures of the same.

The strains will be maintained for a period of at least 30 years from date of deposit, or five years after the most recent request for a sample, whichever is longer. The United States and many other countries are signatory to the Budapest Treaty.

The viability of the cultures cited above was tested October 22, 1998. On that date, the cultures were viable.
